

Folistim Technology

FOLISTIM

ABOUT THE TECHNOLOGY

FOLISTIM TECHNOLOGY AT GLANCE

FOLISTIM TECHNOLOGY, A LINE OF COST EFFECTIVE NUTRITIONAL SOLUTIONS:

- + Effective and fast nutrient supply
- + Promotes strongly early stages growth
- + Promotes stress tolerance in plants
- + Improves soil properties

FOLISTIM TECHNOLOGY BASED PRODUCTS ARE STABLE AND EASY TO USE:

- + Liquid and mixable with other agrochemical products (compatibility test recommended)
- + Totally selective for the crops, due to natural origin
- + Biodegradable products

THE ACTION

- + FOLISTIM Technology contains natural compounds that complex with nutrient elements for an optimal nutrient absorption both through foliar and/or soil application
- + FOLISTIM Technology through biostimulating substances, such as Humic Acids, LSA, seaweed extracts, promotes the vegetative growth and regulates the crop cycle
- + FOLISTIM Technology for the ideal natural plant protection in every growth stage
- + FOLISTIM Technology prevents deficiency symptoms and improves resistance to abiotic stress, enhancing fruit quality and post-harvest quality
- + FOLISTIM Technology based products ensure:
 - > high affinity with plant tissue
 - > immediate nutritional effect
 - > enhanced nutrient mobility
 - > strong biostimulant effects

FOLISTIM TECHNOLOGY IN SHORT

FOLISTIM TECHNOLOGY

Triple action on plant nutrition

↓

**Biostimulation
of plant natural
resistance against
stresses**

↓

**Fast absorption
and lasting
feeding**

↓

**Positive effect on
soil properties**

Folistim Technology

**THE RIGHT COMBINATION OF NUTRIENTS
WITH NATURAL BIOSTIMULATING COMPOUNDS**

FOLISTIM TECHNOLOGY

THE ASSORTMENT

	B	Ca	Co	Cu	Fe	K	Mg	Mn	Mo	N	Ni	P	Si	Zn	SO ₃	Humic Acids	LSA	Other Stimulants
